

Letter of Support

America's energy independence, air quality and economic future are all directly influenced by our vehicle fuel choices. Autogas must play a role in resolving our country's energy crisis. It is a clean, economical fuel that is almost entirely domestically produced, easy to implement and safe to use.

Now is the time to take responsibility for our air and our energy. We must act quickly to secure a sustainable, ecologically sound future. By uniting the Autogas industry and its many stakeholders, Autogas for America will drive immediate, progressive change in America's vehicle fuel choice – from conventional gasoline to Autogas.

I support clean air and clean water.

I support reducing our dependence on foreign oil.

I support Autogas for America.
